

Training on Single Window System (Industry) organized at Rajasthan

By : Yogesh Singh Parmar

A two days state level training on Single Window Clearance System, was organized at Gita Mittal Foundation , Bajaj Nagar, Jaipur from 09th May to 10th May 2011 by NIC Rajasthan, in coordination with Bureau of Investment Promotion (BIP) , Rajasthan. Nodal officers and other concerned officers from the departments JVVNL, Factory & Boilers, Medical Health ,Technical Education, Tourism, Labour and Industries covered in Phase-I of the system, attended the training program.

The objective of the program was to spread awareness among the participants about Single Window Clearance System and to provide operational training for using the web enabled software.

Sh. Nagesh Sharma (DGM) & nodal officer from BIP, highlighted the utility of such centralized software, rules framed for Single Window System and its benefits for better management and transparency.

Sh. Yogesh Singh Parmar, SSA, NIC stated that Single Window Clearance System provides facility to interact with system across the globe, and facilitating better monitoring of process stages of applications for clearances, with the departments, through various MIS reports. The system maintains all stages decisions of all levels and generates the required reports through software itself.

In the training, participants were told , how to use/operate the software and hands on training was provided. Participants made the dummy entries for entrepreneur, nodal agency and department level actions, and process flow also viewed for transactions. The queries of the participants were addressed and feedback of the participants was obtained.

Sh. Nagesh Sharma (DGM, BIP) emphasized the long-term gains of web enabled software. He also interacted with participants about the training and hope for the smooth implementation of the software in the state. He appreciated the efforts of NIC Rajasthan for software and organizing the training.
